To Whom It May Concern,

Utica Academy of Science Charter School is a current partner of Utica College's High School Bridge program. This program allows for UASCS students to take courses from Utica College and receive dual credit from both the college and UAS Charter School. Initially UASCS students focused on coursework in cybersecurity. Our partnership has expanded to include a wide range of courses, and now includes a unique Healthcare Pathway Bridge program designed specifically for UASCS students. These opportunities give students the ability to benefit from being exposed to Utica College professors, industry professionals, student mentors, as well as academic and career pathways crucial to their future.

UASCS students have impressed Utica College faculty with their strong commitment to academic excellence, and we are strong proponent of the faculty and staff who perform such excellent work on behalf of their students.

Sincerely,

Elizabeth Nassar
Director, Academic Business Development
